ABOUT ME

Full-stack developer with over two years' experience in building dynamic web applications. Skills in maintenance, deployment, collaboration and database management with a solid understanding of front-end and back-end development. Seeking opportunities to contribute to innovative projects.

PROFESSIONAL EXPERIENCE

Web Developer

Epack envíos 04/2024 - 08/2024

Contributed to a team of developers to maintain and update a website, significantly improving the scalability and performance of the system.

- **Web Application Optimization:** Improved the visualization and functionality of web applications, resulting in a 80% increase in user satisfaction and operational efficiency.
- **Agile Development:** Implement new features in reduced timeframes, accelerating product by 20%.
- **Team Integration:** Improved the collaboration with other areas, resulting in an 80% increase in operational efficiency and assertive communication.
- **Continuous learning:** Adapting to the team's tools and technologies to keep up with task requirements.
- **Problem Solving:** Handling frustration to stress with high difficulty tasks, resilience and adaptability to face problems and solve them.
- **Dynamic Blog Development:** Implemented a blog that feeds from a database, displaying publications through interactive cards.
- **Debugging and Maintenance:** I performed debugging and maintenance of the application, ensuring its stability and performance.

Freelance Developer

Freelance 01/2023 - 04/2024

I helped develop front- and back-end components and helped launch several successful projects.

- **User management system:** I developed a system in PHP and MySQL, implementing CRUD methodology and ensuring database security.
- **TextDetector:** I integrated AI in Python to analyze emotions in text entered in real time using Flask.
- **FaceCrop:** I developed an application to crop photos using face detection, improving image quality and database matching.

HARD SKILLS

- **Lenguajes**: PHP, JavaScript, Python, HTML/CSS
- **Framework**: Laravel, Flask, Django
- **Bases de Datos:** MySQL, MongoDB
- **Cloud Tools:** IBM

- **Herramientas**: Git, Framework, Bibliotecas

SOFT SKILLS

- Fast learning
- Problems solving
- Assertive communication
- Adaptability
